

4/20™

broad spectrum, brew-ready inoculum

Biologically-enhanced plant growth promoter that produces a complex, multi-dimensional growth response achieved through the enhancement of leaf life

features and benefits

A task specific, freeze-dried blend of bacterial strains and beneficial fungi. This blend has proven to be a remarkably cost effective alternative for those seeking to reduce chemical inputs.

Benefits of using Nutri-Life 4/20 include improved, nitrogen fixation, rapid humus production, increased phosphorus availability, improved nutrient uptake, increased yield, and crop quality improvements.

application rates and guidelines

Starter - Broadacre Crops 4–20 L/ac of brewed concentrate, applied every at planting.

Foliar Spray - Vegetables: 20 L/ac of brewed concentrate, applied every 2 weeks. Orchards, Vineyards & Ornamentals: 20 L/ac of brewed concentrate, applied every 4–8 wks. Broadacre Crops and Pasture: 8–20 L/ac of brewed concentrate, applied as required.

Fertigation - Vegetables: 20-40 L/ac of brewed concentrate applied every 2 wks.

Orchards, Vineyards and Ornamentals: 20–40 L/ac of brewed concentrate applied every 4–8 wks.

composition

Azotobacter vinelandii, Bacillus megaterium, Bacillus subtilis, Bradyrhizobium japonicum, Chaetomium globosum, Pseudomonas fluorescens, Pseudomonas putida, Pseudomonas stutzeri, Rhizobium leguminosarum, Streptomyces albidoflavus, Streptomyces cellulosae & Trichoderma lignorum

safety, storage and handling

Contains live organisms. Do not mix with fungicides/bactericides, toxic chemicals or soil fumigants. Sanitise spray tank before application. Immunocompromised persons (e.g. those undergoing chemotherapy) should not handle or be exposed to microbial products. While handling, brewing and applying microbial products protective clothing, gloves and face masks should be worn. Avoid aerosols generated by aeration. Store in cool, dry place away from sunlight and below 30°C. Refrigerate unused quantity immediately after use and use within 3 months. Contamination of contents may occur at any time after opening. Agriculture Solutions takes no responsibility for opened product not used immediately. **DO NOT FREEZE.**

All microbial products should be added to the tank last after all other inputs have been diluted. Ideally, apply in the late afternoon. Do not exceed 60 psi. While handling and applying microbial products protective clothing, gloves and face masks should be worn. Wash hands after use.

This label is believed to be reliable and should be followed carefully. Injury to the treated crop may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Agriculture Solutions, Inc. or seller. Failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the referred purpose, subject to the factors noted above. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Agriculture Solutions' election, either a refund of the purchase price paid by buyer or user for product bought, or a replacement of the product used. To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
